# Embedding Videos from Curio.ca

To embed a video from Curio.ca into your learning platform:

1. Access the Curio.ca website through the VLC Games and Databases tab
2. Use the Teacher Access Code provided on the VLC Teacher Master Password List to log in to Curio.ca if prompted to do so. This list can be obtained from your Learning Commons Informationist (LCI).
3. Choose a video or other shareable media. Here is an example

4. Click on to get the following window

5. To simply share the link to the video, copy and paste the Permalink into your learning platform. This is the method that you will have to use when providing links to videos in PowerPoint and Teams/OneNote platforms since they do not accept embed codes from Curio.ca.
6. To embed the video into a learning platform, you will need to copy and paste the embedding code by highlighting the entire code in the Embedding box. Choose the Embed size **before** highlighting the code information since this is part of the coding.
7. Paste this code into the appropriate location in your platform. For example, in D2L you must either edit an existing HTML file or create a file. Embed code can be entered in the "Insert Stuff" page of your D2L file.
8. NOTE: Depending on the version of PowerPoint you are using, you may not be able to embed Curio.ca videos into you slide show. You may also be limited to YouTube videos when inserting URL addresses into the Online video option. Currently, Curio.ca is not supported by the version of PowerPoint provided by the UCDSB Microsoft Office365 Suite.
9. Curio.ca videos are free from advertisements and can be uploaded to both public and private learning platforms.
